

NEW: SAFETY LIGHT TYPE HA-SIA

New technical solutions and many years experience in production of the longwall illumination systems type HA-SI / HA-SIE resulted in designing and implementation of production of a new type of lighting HA-SIA having a higher illuminating efficiency (conforming with the requirements of European Union and Directive No 94/9/EG (ATEX)).

Lights type HA-SIA can be delivered in a short time and can be additionally equipped on request with accessories like a place of failure detection switch and magnetic fastening.
